**Medical Reimbursement for Special Education Students**

The District will ask parents or guardians of each student who requires special education, if their child is eligible for Medicaid.

If any child is eligible for Medicaid, but not a current Medicaid recipient, the district will request that the parent or guardian of that child apply for Medicaid.

If any child is eligible for Medicaid, the district will request that the parent or guardian of that child give written permission to allow the district to request Medicaid reimbursements for eligible health-related special education costs.

The Board will provide written notification to the parent/guardian of the student before accessing the student's or parent's or guardian's public benefits or insurance for the first time and prior to the one-time parental or guardian consent and annually thereafter.

The Board will provide written notification to all parents and guardians of children who are Medicaid eligible and currently receiving School Based Child Health (SBCH) services under an individualized education plan (IEP) prior to obtaining parental consent and prior to the continuation of billing Medicaid for the services. After such date, the Board will obtain parental consent from all parents and guardians who are Medicaid eligible and receiving SBCH services under an IEP, in order to access their public benefits or insurance to pay for services under the IDEA.

If permission described above is received, the district will submit claims to the State Department of Administrative Services for reimbursement of any eligible health-related cost.

If permission described above is denied, the district will terminate its efforts to secure Medicaid reimbursements otherwise applicable to the child.

It is understood that in order to be eligible to receive Medicaid reimbursements, the district must, with prior written parental or guardian permission, bill all financially liable third parties for school-based child health services provided to children. This requirement pertains to all special education students, including, but not limited to Medicaid-eligible students.

If parental or guardian permission described above is denied, the district will terminate its efforts to secure third party insurer reimbursements, including Medicaid.

<p><b>Note:</b> <i>Districts can bill for health-related services that are outlined in the student's IEP. In general, services for which a school district may bill Medicaid are: audiologist services, evaluation and testing, nursing services, occupational therapy, physical therapy, speech therapy, psychological services and social work services.</i></p>
